COURSE

Drawing with Color

This class focus on further drawing investigation from observation and accurately representing form in space with an emphasis on colored dry media. Students will continue to learn how to draw with color pencils, pastels, and introduction to watercolor pencils & watercolor brushes. Project themes are still life, student self-driven assignments, and landscapes. *Drawing with Color* will emphasize and implement Color theory broken down into steps. Students will learn about composition, spatial relationship, value contrast, local value/color, light logic, value distribution, pattern, and texture. This class will help a student gain confidence to pursue any painting class he or she desire.

Prerequisites: Drawing fundamentals, Intermediate/Advance drawing
